Education

International Institute of Information Technology, Hyderabad

October 2022 – Present

B.Tech in Computer Science and MS by Research in Computational Natural Science | CGPA: 7.55

BSP Senior Secondary School Sector X, Bhilai

April 2020 – July 2022

Class XII | Percentage: 94.2%

Work Experience

Patenti Technology Solutions

January 2024 – April 2024

Software Engineering Intern

Remote

- Built an AI-powered medical chatbot **CoviCare** handling **500+ COVID-19 FAQs** with a curated knowledge base of **10k+ Wikipedia entries**.
- Designed a **3-layer NLP pipeline** with **BERTScore** filtering, **RAG via ChromaDB**, and Gemini API integration.
- Developed a **Django + Bootstrap web app** with authentication and conversation history, optimizing retrieval to cut latency by **80%**.

Projects

TCN | *Python, Flask, SQLite*

[GitHub](#)

- Built a full-stack web application (**The Contact Network**) for student and faculty management using **Python, Flask, SQLite** with a responsive front-end in **HTML, CSS, and JavaScript**.
- Automated faculty data collection via web scraping using **BeautifulSoup** and **requests**, and implemented robust **CRUD** operations for seamless data handling.

IPL-Database | *Python, Flask, MySQL*

[GitHub](#)

- Built a **Command Line Interface (CLI)** software for **Indian Premier League** database management with **proper entities, relations, and functional requirements**.

Simple Network File System | *C, Sockets, Linux System Calls*

[GitHub](#)

- Implemented a basic **Network File System (NFS)** enabling remote file access and manipulation using a **client-server architecture**.
- Designed a server to process file operations and a client interface supporting commands like **read, write, and delete**.

Location Predictor using Images and Metadata | *Python, ResNet, Deep Learning*

[GitHub](#)

- Designed and trained an **ResNet-based deep learning model** to predict **latitude, longitude, camera angle, and region ID** using image data and metadata from a large-scale campus dataset.
- Implemented **multi-output regression and classification** by integrating spatial and visual features from diverse campus viewpoints.

Relevant Coursework

- **Computer Science:** Computer Programming · Data Structures & Algorithms · Algorithm Analysis and Design · Design and Analysis of Software Systems.
- **Machine Learning:** Statistical Methods in AI · Machine, Data and Learning.
- **Mathematics:** Discrete Structures · Linear Algebra · Probability & Random Process · Real Analysis.

Technical Skills

Languages: Python, C/C++, HTML, CSS, JavaScript, SQL.

Tools/Platforms: GIT, MySQL, SQLite.

Frameworks/Libraries: Django, Flask, Pandas, Sklearn.

Achievements / Leadership Roles

JEE Mains | *Qualified - AIR 8760 : 99.04 Percentile*

JEE Advanced | *Qualified - AIR 6013*

Sports Council Core Member | *IIIT Hyderabad* - Organised events with 1000+ participants

Captain | *Chhattisgarh Chess Team* - Captained at 63rd SGFI National School Games, Warangal
